(File panels) Previous tab	⇧⌘[

Action	Key Equivalent
(File panels) Next tab	⌘⌘]
(File panels) Go to Home directory	~
(File panels) Go to Root directory	/

## Frequently Asked Questions

- **Can I see folders, which are started with dot (for ex., *.folder*)**
- Yes! Just toggle this option with Menu->View->View Hidden Files or by hitting ⌘⇧⌘I
- **It would be really handy to have editable “Favorites” list**
- Files use Finder’s sidebar Favorites to build GoTo list (shown by F1/F2 or by “Go to” button). Meanwhile Finder’s Favorites list can be easily altered with regular drag&drop.
- **Can I manually erase all Files’ settings?**
- Yes, to do that you should remove the following items:
  - ~/Library/Preferences/info.filesmanager.Files.plist
  - ~/Library/Saved Application State/info.filesmanager.Files.savedState
  - ~/Library/Caches/info.filesmanager.Files
  - ~/Library/Application Support/Nimble Commander
- **Can I delete or edit a selected recent network connection?**
- Yes, you can edit it straight from a menu with Shift key pressed. To remove a single connection, hold Opt (Alt) button when in Connect To... menu.
